

Recruitment team  
SAP Walldorf,  
Germany

March 2, 2017

Job Reference: Requisition ID - 137879: ABAP/C++/Java Developers for core server technology

Dear Madam or Sir,

I recently graduated with a Doctor's degree (Dr.-Ing.) in electrical engineering from Karlsruhe Institute of Technology, Karlsruhe, Germany. My doctoral thesis primarily focuses on cognitive radio that presents an alternative approach of resolving spectrum scarcity for the upcoming 5G networks, by opportunistically accessing the licensed spectrum. Besides research, I successfully participated in a BMBF (German Federal Ministry of Research and Education) project, supervised master and bachelor theses, held tutorials and laboratory during the semester.

Since I am highly interested in research and development, I believe starting as a software developer at SAP would be the next logical step for me. I am approaching you in this matter because your group is looking for candidates that will work on SAP Core technology, which appears to me an exciting opportunity. Besides, I am mainly attracted about the fact that the job description promotes a conducive work environment, knowledge sharing and clear exchange of ideas. It is worthy to mention here that, I believe, I have profound programming skills (C/C++) and suitable experience in software development. Apart from this, I am willing to extend my programming skills in ABAP and Java.

Besides, I have been associated with open source community, [GNU Radio](#), where I have participated as a mentor in [Google Summer of Code 2013](#) and contributed by writing tutorials for the community. Moreover, since 2013, I have been serving as treasurer for [IEEE student branch Karlsruhe](#). These voluntary activities describe my social competence, which, I believe, to a certain extent suffices the job requirements, such as team building and knowledge sharing.

As far as the German language is concerned, I have acquired B1 certification and also possess the capacity to express my views in a clear fashion. In addition to this, I am willing to enhance my language skills towards proficiency. Apart from my professional interest, I believe working at SAP is beneficial for me from a personal perspective, as my wife Mini Kaushik will start at SAP from April 2017 under the department of Mr. Werner Wolf. I would like to mention here that Mr. Wolf has recommended me to apply for the job position.

I would like to contribute to the ongoing development at SAP and hope that my profile fits to your requirements. I am looking forward to hearing from you.

Yours faithfully,  
Ankit Kaushik
